SUMMARY

Passionate final-year Software Engineering undergraduate at The Open University of Sri Lanka, skilled in full-stack development, mobile app design, and backend integration. Strong in programming, testing, and team-based projects, with a drive to deliver user-focused solutions.

EDUCATION

- **Bachelor Of Software Engineering -** (The Open University of Sri Lanka — 2022–Present)
- **Full Stack Web Developer Certificate Course (in progress)-** (University Of Moratuwa)
- **Pre-Intermediate English Course - School For English (SVS)** (Selected - Intermediate Level)

TECHNICAL SKILLS

Languages & Frameworks: Java, Python, C, Dart, R, JavaScript, PHP, HTML, CSS, Flutter,Tailwind

Web & Mobile Development: Flutter, Firebase, REST APIs, Postman, Git, GitHub, MySQL, SQLite

Software Testing: Selenium IDE, JUnit, Manual Testing, JMeter

Tools & Platforms: Figma, Balsamiq, Canva, Photoshop, Agile/Scrum, Scratch, Code.org, Jira,

PROJECTS

Harvest Hub – Cross-platform Mobile App

Flutter, Firebase

- Developed a responsive agriculture platform with real-time database integration
- Integrated Firebase authentication and file storage
- Collaborated with a team to deliver a production-ready MVP

ReiseAufSriLanka.com – Automated Web Testing

Selenium IDE, Java, JUnit

- Designed and executed UI and functional tests
- Identified bugs and generated structured test reports
- Automated test cases and exported for integration into test suites

E-Commerce Website

HTML, CSS, JavaScript

- Developed a responsive website with shopping and category features
- Focused on optimized layout for desktop and mobile screens

Weather Forecast Application

Python, Tkinter, APIs

- Built a desktop weather app with real-time data from OpenWeatherMap
- Included GUI elements for user-friendly interaction

Milk Company Management Website
PHP, HTML, CSS
Designed and implemented admin portal for customer and supply chain records
Enabled CRUD operations and dynamic user interface

Inventory Management System
HTML,CSS,JavaScript,php,SQL, jQuery
Built a responsive web-based inventory management system with CRUD operations, real-time stock tracking, and reporting features to streamline inventory control.

AI & IoT-Based Air Pollution Detection (Ongoing Research)
Real-time air quality prediction using ML, satellite data, and IoT sensors

CERTIFICATIONS

- Completed Certificate in **HTML and CSS** - SoloLearn
- Completed Certificate in **Java course** - SoloLearn
- Completed Certificate in **Python Data Structure, and Python for Beginners** - SoloLearn
- Completed Certificate in **SQL** - Sololearn
- Completed Certificate in **R Language** - alison
- Completed Certificate **API Test Automation with Postman** - Test Automation University
- Completed Certificate **Codeless Test Automation with Selenium IDE** - Test Automation Uni
- Completed Certificate **Web Element Locator Stratergies** - Test Automation University
- Completed Certificate **Cost of Software Quality** – EdApp (2025)

LEADERSHIP & EXTRACURRICULAR

Secretary – Faculty Engineering Student Conference, Open University

Vice Chair – Women in Engineering (WIE), Open University

Junior Editor – IESL Student Chapter

Member – IEEE Student Branch (2022–Present)
